Aeration Filtration

- Uses the air we breathe to clean
- No harmful chemicals used
- Removes Iron / Sulfur / Manganese / Adjusts low pH
- No More Staining on Clothes or Fixtures
- Improves Taste
- No More Foul Smells
- Traps Sediment

Filter your water for healthier living!
WaterSoft Aeration Systems use the air we breathe to naturally reduce the effects of iron, manganese and sulfur gas. As oxygen is introduced to the water, contaminants chemically change to physical particles capable of being removed by filtration. Aeration technologies safely provide fresh water for your household without the use of harmful chemicals!

WHICH AERATION SYSTEM IS RIGHT FOR YOU?

**CENTURI**
Iron & Sulfur Filter

- Simplicity of a single tank aeration system that can be used with any type of well pump system (standard submersible, constant pressure, jet pump)
- Air draw cycle can be initiated without a backwash cycle saving 1000's of gallons of water annually.
- The control valve slowly releases compressed air charge prior to backwash cycle eliminating the explosive blast that can dislodge the drain line on competitors systems

THE CENTURI ‘S’ FILTER IS ALSO AVAILABLE FOR SULFUR ONLY

**SIDEWINDR**
Iron & Sulfur Filter

- Simplicity of a single tank aeration system that can be used with any type of well pump system (standard submersible, constant pressure, jet pump)
- Air is injected into the top of the tank converting ferrous iron to ferric iron after untreated water has passed through the control valve preventing the control valve from fouling with iron
- Air draw cycle can be initiated without a backwash cycle saving 1000's of gallons of water annually. Only requires one tank
- The control valve slowly releases compressed air charge prior to backwash cycle eliminating the explosive blast that can dislodge the drain line on competitors systems
- Oxy-Clean option for iron and sulfur bacteria control
- Ozone Complete option for chemical free iron and sulfur bacteria control

7-Year Limited Warranty Factory Warranty on all Isobar Valves
Aeration systems improve the taste of water and eliminate foul smells and staining on clothes and fixtures. Even better, these systems use the air we breathe to clean water naturally with NO harmful chemicals!

**PROVECTR**  
Iron & Sulfur Filter

- Easy programming to adjust time and system settings
- Ideal for removal of higher levels of iron, manganese, and sulfur
- No chemicals required
- Ideal for removal of higher levels of Iron, Sulfur and Manganese

**PLUS**

- Easy programming to adjust time and system settings
- Designed for use with constant pressure or jet-type pump systems
- No chemicals required
- Includes oil-less air compressor, electric contact flow meter with relay box
- Ideal for removal of higher levels of Iron, Sulfur and Manganese

**ALL ISOBAR III VALVES FEATURE LEGACY VIEW**

Legacy View makes setting up and monitoring your WaterSoft Water Treatment System easier than ever. When used with a Legacy View Valve the user, through the app, can do the following functions:

- Conveniently view all valve settings and status
- Easily change valve settings
- View current water usage information, as well as history of water usage
- Graphically view water usage information
- Start a regeneration or backwash cycle from your phone or tablet
- Set / view the servicing water treatment dealer information
- Better understand how your system is working and understand what settings are for

**Only hydrogen peroxide should be used in Oxyclean option for units containing carbon**

---

### OXY-CLEAN OPTION

For iron and sulfur bacteria control.

Option available for the Sidewindr

---

### OZONE COMPLETE OPTION

For chemical free iron and sulfur bacteria control.

Option available for the Sidewindr

---

Eliminates Staining and Rotten Egg Smell
